

NITHYAPRIYA VEERARAGHAVAN

Senior AI Product Manager

Bengaluru, India • nithya.v@outlook.com • +91 8897464355

PROFESSIONAL SUMMARY

Senior AI Product Manager with 10+ years delivering AI products from discovery to launch across healthcare, supply chain, and enterprise platforms. Proven in agentic AI, multi-agent systems, LLM integration, and NLP — with \$6.4M+ in documented cost impact, 75% AI adoption rates, and products in the hands of 500K+ global users. Fluent across 0-to-1 startup builds and regulated enterprise environments. PSPO-certified.

PROFESSIONAL EXPERIENCE

Head – Product Management | PetaSight Inc.

Feb 2026 – Present

- Lead product strategy, roadmap, and end-to-end delivery for an AI-powered healthcare platform — from initial user discovery through MVP — in a high-velocity, early-stage environment.
- Led end-to-end product build as the founding PM — user research, requirements, wireframing, agentic workflow design, and iterative delivery — shipping 3+ features to production within the first quarter.
- Uses AI-assisted development to independently prototype, validate UX flows, and iterate on specs — compressing discovery-to-build cycles without engineering dependency.
- Own the external product story: investor-facing narratives, live AI demos, and stakeholder communications that translate complex agentic capabilities into clear business value.
- Primary interface between users, engineering, and leadership — ensuring every product decision is grounded in validated user need, healthcare domain expertise, and commercial reality.

Lead – Product Management | Opura AI

Sept 2025 – Jan 2026

- Architected a multi-agent orchestration (MAO) system coordinating 5+ specialised AI agents for personalised, context-aware shopping experiences — fully 0-to-1.
- Defined agent roles, handoff protocols, memory architecture, and failure modes; partnered with ML engineers on LLM selection, prompt engineering, and eval frameworks.
- Delivered concept to functional MVP: user story mapping, wireframing, API contract design, and agentic workflow integration with engineering.
- Built go-to-market strategy, investor pitch narrative, and customer discovery framework; shaped company positioning in a competitive AI-first market.

Senior Product Manager | Resilinc.ai

Jul 2024 – Sept 2025

- Owned product vision and end-to-end delivery for 3+ supply chain AI products serving 500K+ global enterprise users — raising customer satisfaction by 25% through continuous discovery-led iteration.
- Designed and shipped an ML-powered risk scoring engine with 20+ API integrations; improved supply chain disruption prediction and boosted operational efficiency by 20% across enterprise clients.
- Co-created REVA — an LLM-powered assistant with natural language querying, real-time scenario simulation, and autonomous insights summarisation, bringing conversational AI to enterprise supply chain management.
- Ran a structured Supplier Advisory Board of 30+ enterprise leaders monthly; translated their input directly into roadmap priorities and GTM decisions.

Senior Specialist – Products (Healthcare AI) | Novartis

Nov 2020 – Jul 2024

- Maintained a pipeline of 4 AI/ML proof-of-concepts per quarter with 75% enterprise adoption — among the strongest adoption rates in the organisation; GenAI solutions reduced manual effort by 50% and costs by 25%.
- Designed and launched an NLP-powered data redaction and anonymisation platform across Novartis global systems — \$6.4M in cost savings, 30% compliance improvement, and measurably stronger patient data protection.
- Deep healthcare domain expertise: translated HIPAA-adjacent regulatory requirements, clinical data governance constraints, and legal obligations into AI product features that passed compliance review and got adopted at scale.
- Functioned as the connective PM layer across clinical, IT, legal, business, and third-party vendors — running parallel AI/ML backlogs simultaneously across a zero-error-tolerance environment.

Data Scientist | Novartis

Jun 2018 – Oct 2020

- Developed XGBoost/Marketing Mix Model to optimise clinical trial timelines with 85% accuracy, accelerating time-to-market for life-sciences therapeutics.
- Built enterprise R-Shiny NLP text mining application for document complexity analysis and Dash Plotly dashboards for real-time financial spend anomaly detection.

Software Engineer | Tech Mahindra

Nov 2014 – Apr 2017

- Built and maintained automated test frameworks that lifted QA coverage by 35% and resolved 50+ critical production defects, accelerating release velocity by 20% — an early grounding in the full software delivery lifecycle.

CORE SKILLS & EXPERTISE

AI & Product: Agentic AI & Multi-Agent Systems | LLM Integration & Prompt Engineering | RAG Architecture & AI Evals | NLP & Conversational AI | 0-to-1 Product Development | AI/ML Roadmapping

Domain: Healthcare AI & Regulatory Compliance | Supply Chain AI | Enterprise SaaS | Early-Stage Startups

Execution: Go-to-Market Strategy | Stakeholder & C-Suite Communication | Agile / Scrum (PSPO) | A/B Testing | Data-Driven Decision Making

Tools: Python | Tableau | PowerBI | Balsamiq | Figma | TIBCO Spotfire

EDUCATION

Post Graduate Program in Management – Data Analytics & Operations

2017 – 2018

Great Lakes Institute of Management, Chennai

Bachelor of Engineering – Industrial Management

2010 – 2014

Visvesvaraya Technological University, India

CERTIFICATIONS & LANGUAGES

Certification: Professional Scrum Product Owner (PSPO) | **Languages:** English, Tamil, Kannada, Hindi
